ABOUT ME

M. Fathin Halim is a programming student from Indonesia with a strong passion for technology and coding since childhood. With a high level of creativity and an eagerness to learn, Fathin has developed various innovative applications across different fields, including education and social media, showcasing strong problem-solving skills and proficiency in modern programming technologies.

In addition to technical expertise, Fathin possesses excellent public speaking skills, supported by experience in presenting ideas and projects in various settings. This combination of technical and communication abilities enables Fathin to collaborate effectively in teams, share knowledge confidently, and present solutions in a clear and engaging manner.

Fathin is committed to continuous growth and aspires to create impactful technological solutions that bring positive contributions to society.
