## ABOUT ME

M.Fathin Halim is a junior high school student in Indonesia who has had a strong interest in programming since childhood. Fathin has developed various innovative applications, including in education and social media, with creativity and a high enthusiasm for learning.

## PORTOFOLIO

**Kamus Bahasa Rejang**
A digital dictionary application that helps users to understand and learn Rejang, one of the regional languages in Indonesia.

**My Simple Notes**
A web where you can save your notes! M.Fathin halim made it to keep his notes and to study

**rejangpedia**

rejangpedia is a multi-purpose application with a spirit of mutual cooperation in preserving Bengkulu culture in general and Rejang Lebong in particular in the form of digital literacy that can be followed by everyone.

**Shared Gallery**
Shared Gallery is a website to share your photos anonymously and find photo ideas from other people.

**CerdasAI**
Smart AI is an AI made by Fathin and his team in the Garuda Hack 4.0 competition. This AI aims to help parents in using AI in today's technological era.

**URLShorterner**
Url Shorterner made by Fathin

**Texter**
A Text based social media inspired by Twitter or Threads to share moment
